

LOOP CARDS

PURPOSE

Practice multiplication using 3, 6, 12

MATERIALS

- **Loop Cards**

HOW TO PLAY

1. Use the 3, 6, 12 I have, who has loop cards for this session.
2. Hand out one card to each learner, including yourself. If you have extras, give a second to a number of learners.
3. The person who has the card labelled "START" begins by reading what is on their card. E.g. "who has 3 x 3?"
4. Learners must check their cards for the answer to 3 x 3 and read what is on their card e.g. "I have 9. Who has 3 x 6?"
5. The game continues until play returns to the person who started. • NB: After the game, remember to make the connections between these tables using the doubling strategy
